Our Work

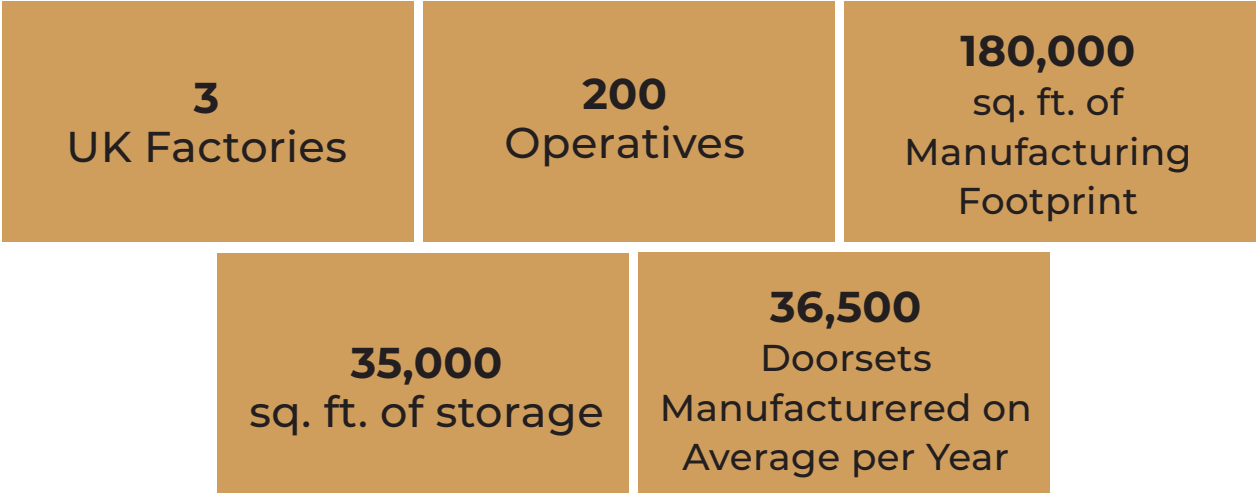

# THE HALL & TAWSE COLLECTION BY DORSUITE

## Highly Experienced Professionals Working with Professionals

Operating across our 3 factories in the UK, we have over 180,000 sq. ft. of production and storage facilities. We employ more than 200 specialists from time-served craftsmen to our technical team, individual project managers and our valued apprentices.

As industry experts for over a century, we have an established reputation across the country as highly skilled specialists who provide innovative excellence. We are continually investing in our people, our production facilities and our machinery, to deliver state of the art products and services to our valued client base.

We will work with you at every stage of your development from helping to prepare your specification, accessing our extensive library

of CAD drawings and details, manufacturing environmentally certified products to delivering on time and on budget.

Working with asset management, compliance, delivery, investment and maintenance teams we provide a water-tight framework from which assured solutions are conceived.

## OUR DOORSETS

### A Complete Doorset Solution

Designed and tested to perform as one unit by the doorset manufacturer. Constructed to exacting standards and tolerances under third-party audited factory production-controlled conditions.

#### Fire and Smoke

The dual scope system is certified by the Q Mark Fire Door Manufacturer Scheme will perform to 30 minutes for fire and ambient smoke. The components of the system have been extensively tested to the British Standard BS 476: Part 22, and to European Standards BS EN 1634-1, BS EN 1634-3. Furthermore, we have taken this one step further, conducting our own primary fire and smoke testing for the complete design for test exposure from each side of the doorset separately, fully compliant with Part B of the building regulations.

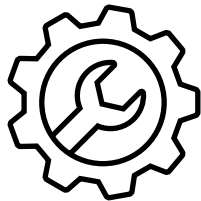

#### Dual Certification

The dual scope system is certified by the Q Mark Enhanced Security Scheme. The system has been tested to PAS24: 2016. The dual scope system is licensed by Secured by Design, the Official Police Security Initiative.

#### Security

The dual scope system is certified by the Q Mark Enhanced Security Scheme. The system has been tested to PAS24: 2016. The dual scope system is licensed by Secured by Design, the Official Police Security Initiative.

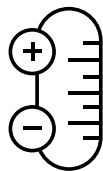

#### Operation and Durability

Tested to the industry standard BS 6375-2&3 for operation & strength including resistance to repeated opening and closing and soft and heavy body impact.

#### Weathering

Tested to the industry standard BS 6375-1 for Weathertightness including tests for air permeability, water tightness and wind resistance.

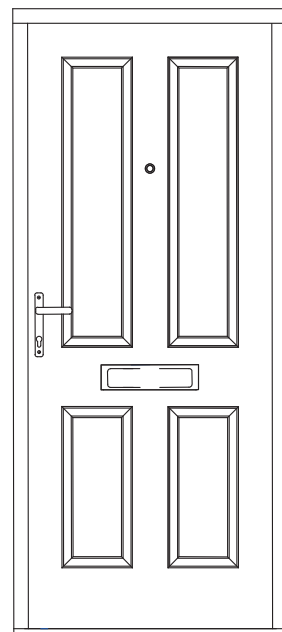

#### Thermal transmittance

Industry standard test reports to BS EN ISO 10077 for Thermal transmittance for both glazed and unglazed options, compliant with Part L of the building regulations for external fire doorsets in existing dwellings.

## Safe and Sustainable

The Hall & Tawse Collaborative Range is a high quality, fully finished and engineered solution. Using responsibly sourced materials, comprising frame, pre-hung door leaf and all essential ironmongery all pre-assembled in the factory and made to measure with expert craftsmanship. It is delivered to site as a package for simple

reassembly and installation. Available in a number of different traditional and contemporary styles to suit your project.

## OUR ACCREDITATIONS

Secured by Design

### Secure by Design

Secure by Design (SBD) is the official police security initiative that works to improve the security of buildings and their immediate surroundings to provide safe places to live, work, shop and visit. The flat front entrance doorsets are accredited to the SBD standards, meaning that there is a high standard of security.

## Verified Safe Protected

We supply Communal doorsets for Social Housing projects which have been tested against current British and European Standards - keeping residents safe and secure.

With extensive experience manufacturing FD60S configurations we have worked with a myriad of Local Authorities & Housing Associations at the design end to determine an assured solution.

Delivering professional solutions for low, medium and high-rise properties whilst accommodating the needs for an inclusive variety of tenure, is at the cornerstone of our best practise policy.

The Hall & Tawse Collection from DorSuite has the promise that every doorset manufactured meets with the exacting industry standards. With every project reviewed by our experienced in-house Compliance professionals we are confident that all aspects of Fire , Security, Thermal & Acoustic Accreditations are fully met.

This level of due-diligence is a necessity particularly where Fire Protection is involved and also ensures your Operational & Maintenance information can be collated in advance production, in keeping with The Golden Thread.

## Case Study

Working closely with Harrow Council, we developed a solution for the delivery of communal fire rated doorsets and screens for the councils' housing stocks in Buckingham and Whitchurch.

## Your Trusted Partner

Having worked collaboratively with Islington Council's Fire Protection Team, DorSuite helped to provide a compliant solution for their current Fire Rated Flat Entrance Doorset (FED) Replacement Programme.

To date, over 2000 FED's have been installed and the Programme will progress to completion via the Term Contractor and their Installation Team. In addition to the FED's on this Programme DorSuite supply the fire-rated Communal Door-sets, Duct Doorsets, Second Means of Escape Door-sets and ancillary Cupboard Door-sets.
